## About me

I look at Graphic Design as a minimalistic language, a Graphic Designer learns this language along with its principles and elements. This then enables them to communicate numerous paragraphs in a single image or a 30 second video. My mission as Graphic Designer is to mend and bend this language in order create a style of Design/Communication that executes the objective while looking unique and attractive.

## Personal Skills

- Resourcefulness
- Punctuality
- Adaptability
- Sociability
